

QUALITY, ENVIRONMENT, ENERGY AND OCCUPATIONAL RISK PREVENTION POLICY

CHILCHES MATERIALS, S.A., located in Polígono Industrial Els Plans, Sector Z I in Chilches (Castellón), from the beginning of its activity as a Materials Processing Plant has wanted to maintain a firm commitment to Quality, Environmental protection, energy management and Prevention of Occupational Hazards and Serious Accidents. The company strives to make its industrial development compatible with the care of the environment in which it is located, controlling the environmental impact of its activity, monitoring compliance with safety measures in terms of Risk and Serious Accident Prevention and guaranteeing at all times products of the highest quality and a service in accordance with the customer's requirements.

Expression of this commitment is the POLICY that the company's management has defined, articulated on the basis of the following principles:

- 1.-** We will achieve the leadership of the company in its business environment.
- 2.-** We will ensure compliance with the applicable environmental legislation and regulations and the Prevention of Occupational Hazards and Serious Accidents, as well as those related to energy efficiency, energy use and energy consumption and any other commitment that *CHILCHES MATERIALS S.A.* may subscribe voluntarily.
- 3.-** We will identify and evaluate the aspects that may have a significant impact on the environment associated with the development of the activity, as well as in the beginning of new ones, setting objectives, goals and criteria for action to avoid or minimize the possible environmental impacts.
- 4.-** We will periodically review the fulfillment of the objectives, taking actions and allocating the necessary resources to obtain the best possible results, maintaining the commitment of continuous improvement of Quality, Environment, energy management, Occupational Risk Prevention and Serious Accidents acquired by the company.
- 5.-** We will reduce the quantity and/or hazardousness of waste, spills and emissions generated as a consequence of the company's activity. We will gradually introduce those techniques and scientific advances that, being economically viable, allow us to guarantee an adequate protection of health and the natural environment.
- 6.-** We will establish energy criteria in the design and seek continuous improvement of energy performance and our energy management system.
- 7.-** We will evaluate the risks and apply the necessary corrective measures to avoid them, reducing the possibility of accidents occurring and monitoring the health of the workers.
- 8.-** We will provide the necessary training, awareness and motivation to the company's staff to promote a culture of quality, safety and respect for the environment and energy efficiency during the performance of their responsibilities and functions.
- 9.-** We will disseminate the commitment acquired by *CHILCHES MATERIALS S.A.* among our employees, customers, suppliers and all those who act on behalf of the company, encouraging them to know and act in accordance with the principles established in the framework of this policy.
- 10.-** We will promote the acquisition of energy efficient products and services that have an impact on energy performance.

The knowledge and acceptance by all employees of *CHILCHES MATERIALS S.A.* of the principles set forth in this policy is a condition of employment in our Company.
